ABS Inclinator Casing

Durable ABS casing for portable and servo-type inclinometers in underground installations.

Key benefits

- Strong ABS construction
- Grooved pipe for direction control
- Suitable for underground displacement monitoring

Engineering highlights

Rugged enclosure: Protects inclinometer sensors in harsh underground conditions.

Directional control: Groove design maintains measurement orientation.

Portable installation: Works with servo and portable inclinometer systems.

Typical applications

- Underground displacement
- Embankment monitoring
- In-place inclinometer installations

Technical specifications

Specification	Value
---------------	-------

Material	ABS plastic
Use case	Underground inclinometer pipe
Compatibility	Servo and portable systems
