

Displacement Crack Meter

Displacement & Settlement Monitoring | Product brochure

VW Type Displacement Meter (Crack Meter)

Wireless crack meter for structural displacement monitoring with anchor-based installation.

Key benefits

- Wireless displacement monitoring
- Battery-powered operation
- Suitable for concrete and steel structures

Engineering highlights

Wireless reporting: Transmits displacement data remotely.

Field reliable: Works in harsh construction environments.

Anchor-based installation: Securely mounted across cracks and joints.

Typical applications

- Crack growth tracking
- Structural movement
- Safety monitoring

Technical specifications

Specification	Value
---------------	-------

Type	Wireless crack meter
Power	Battery powered
Communication	LoRaWAN
