

Environmental Sensor

Vibration & Environmental Monitoring | Product brochure

Environmental Sensor

All-in-one wireless sensor for air quality, noise and wind monitoring in environmental assessment.

Key benefits

- Multi-parameter environmental sensing
- Real-time LoRaWAN transmission
- Single standalone unit replaces multiple instruments

Engineering highlights

Integrated measurements: Combines air quality, noise and wind sensing.

Wireless site deployment: Ideal for remote environmental monitoring.

Platform-ready: Feeds data into the MyMove IoT dashboard.

Typical applications

- Air quality monitoring
- Noise assessment
- Weather conditions tracking

Technical specifications

Specification	Value
---------------	-------

Sensors	Air quality / noise / wind
Communication	LoRaWAN
Housing	Weatherproof
