

LoRaWAN Gateway

Connectivity & Gateways | Product brochure

Gateway

Central hub for remote monitoring networks, transmitting sensor data securely to cloud systems.

Key benefits

- Multi-channel backhaul over Ethernet, 4G LTE and Wi-Fi
- Redundant communication for reliable data flow
- Rugged design for industrial deployment

Engineering highlights

Network backbone: Connects many field sensors into a single monitoring network.

High reliability: Designed for remote and hard-to-access locations.

Cloud-ready: Seamless integration with MyMove monitoring platform.

Typical applications

- Site-wide sensor networks
- Remote infrastructure
- Construction monitoring

Technical specifications

Specification	Value
---------------	-------

Backhaul	Ethernet / 4G LTE / Wi-Fi
Power	12–24 VDC
Operating temperature	-20°C to +60°C
