

# Pavement Marker

Survey Targets & Markers | Product brochure

Pavement Marker

Die-cast aluminium settlement marker for pavement and surface movement monitoring.

## Key benefits

- Durable settlement reference marker
- Semi-spherical head for precise survey targeting
- Designed for long-term surface monitoring

## Engineering highlights

**Surface reference:** Provides a stable point for settlement surveys.

**Robust build:** Die-cast aluminium construction.

**Precision targeting:** Ideal for repeated monitoring visits.

## Typical applications

- Pavement settlement
- Surface deformation
- Road and runway monitoring

## Technical specifications

| Specification | Value |
|---------------|-------|
|---------------|-------|

|          |                       |
|----------|-----------------------|
| Material | Die-cast aluminium    |
| Diameter | 110 mm                |
| Use      | Settlement monitoring |
