

Spot-Weldable Strain Gauge

Strain & Load Monitoring | Product brochure

VW - Spot-Weldable Type Strain Gauge

Coil-housed spot-weldable strain gauge for responsive measurement with corrosion resistant design.

Key benefits

- Waterproof and corrosion resistant
- Responsive to structural changes
- High stability under long-term loading

Engineering highlights

Spot-weld installation: Quick mounting to steel elements for stress monitoring.

Corrosion resistant: Designed for harsh field exposure.

High response: Captures dynamic strain changes clearly.

Typical applications

- Steel beam monitoring
- Construction stress analysis
- Bridge component measurement

Technical specifications

Specification	Value
---------------	-------

Gauge type	Spot-weldable
Accuracy	±0.1% FS
Temperature range	-20°C to +80°C
