

VW Type Load Cell

Strain & Load Monitoring | Product brochure

VW Type Load Cell

High-accuracy load cell for anchor reaction force measurement in retaining walls and soil anchors.

Key benefits

- Measures axial force in anchors
- Installed at earth anchors and tiebacks
- Helps assess stability after installation

Engineering highlights

Anchor load measurement: Precise force readings for soil and rock anchors.

Field ruggedized: Built for geotechnical construction environments.

Reliable reporting: Used in support and retaining wall validation.

Typical applications

- Anchor load testing
- Retaining wall support
- Slope stabilization monitoring

Technical specifications

Specification	Value
---------------	-------

Type	VW Load Cell
Capacity	Up to 2000 kN
Output	mV/V
