

# Water Level Indicator

## Survey Targets & Markers | Product brochure

Water Level Indicator

Portable hand-operated instrument for groundwater depth measurement in wells and boreholes.

### Key benefits

- Accurate groundwater depth readings
- Portable, hand-operated design
- Reliable in wells, boreholes and storage tanks

### Engineering highlights

**Field portability:** Easy to use in remote hydrogeological surveys.

**Precise measurement:** Reliable groundwater depth readings.

**Robust construction:** Built for well and tank conditions.

### Typical applications

- Groundwater monitoring
- Borehole measurement
- Hydrogeological surveys

### Technical specifications

| Specification | Value |
