

Wheel-Type In-Place Inclinator

Tilt & Inclinator Systems | Product brochure

Wheel Type In-Place Inclinator

In-place inclinometer with wheel-type measurement for horizontal displacement monitoring.

Key benefits

- Measures movement across depth
- Built for excavation and natural ground
- High-resolution sensing

Engineering highlights

In-place monitoring: Captures horizontal displacement over long zones.

Customizable length: Available in 1.0–3.0 m gauges for excavation works.

High resolution: Detailed movement data for critical projects.

Typical applications

- Excavation monitoring
- Ground displacement
- Foundation movement

Technical specifications

Specification	Value
---------------	-------

Gauge length	1.0–3.0 m
Resolution	0.001 mm
Installation	In-place inclinometer pipe
